SOCIETY

At The Lalit Suri Hospitality Group,

We Care

internally for our guests and employees
as well as externally for our
society and environment.

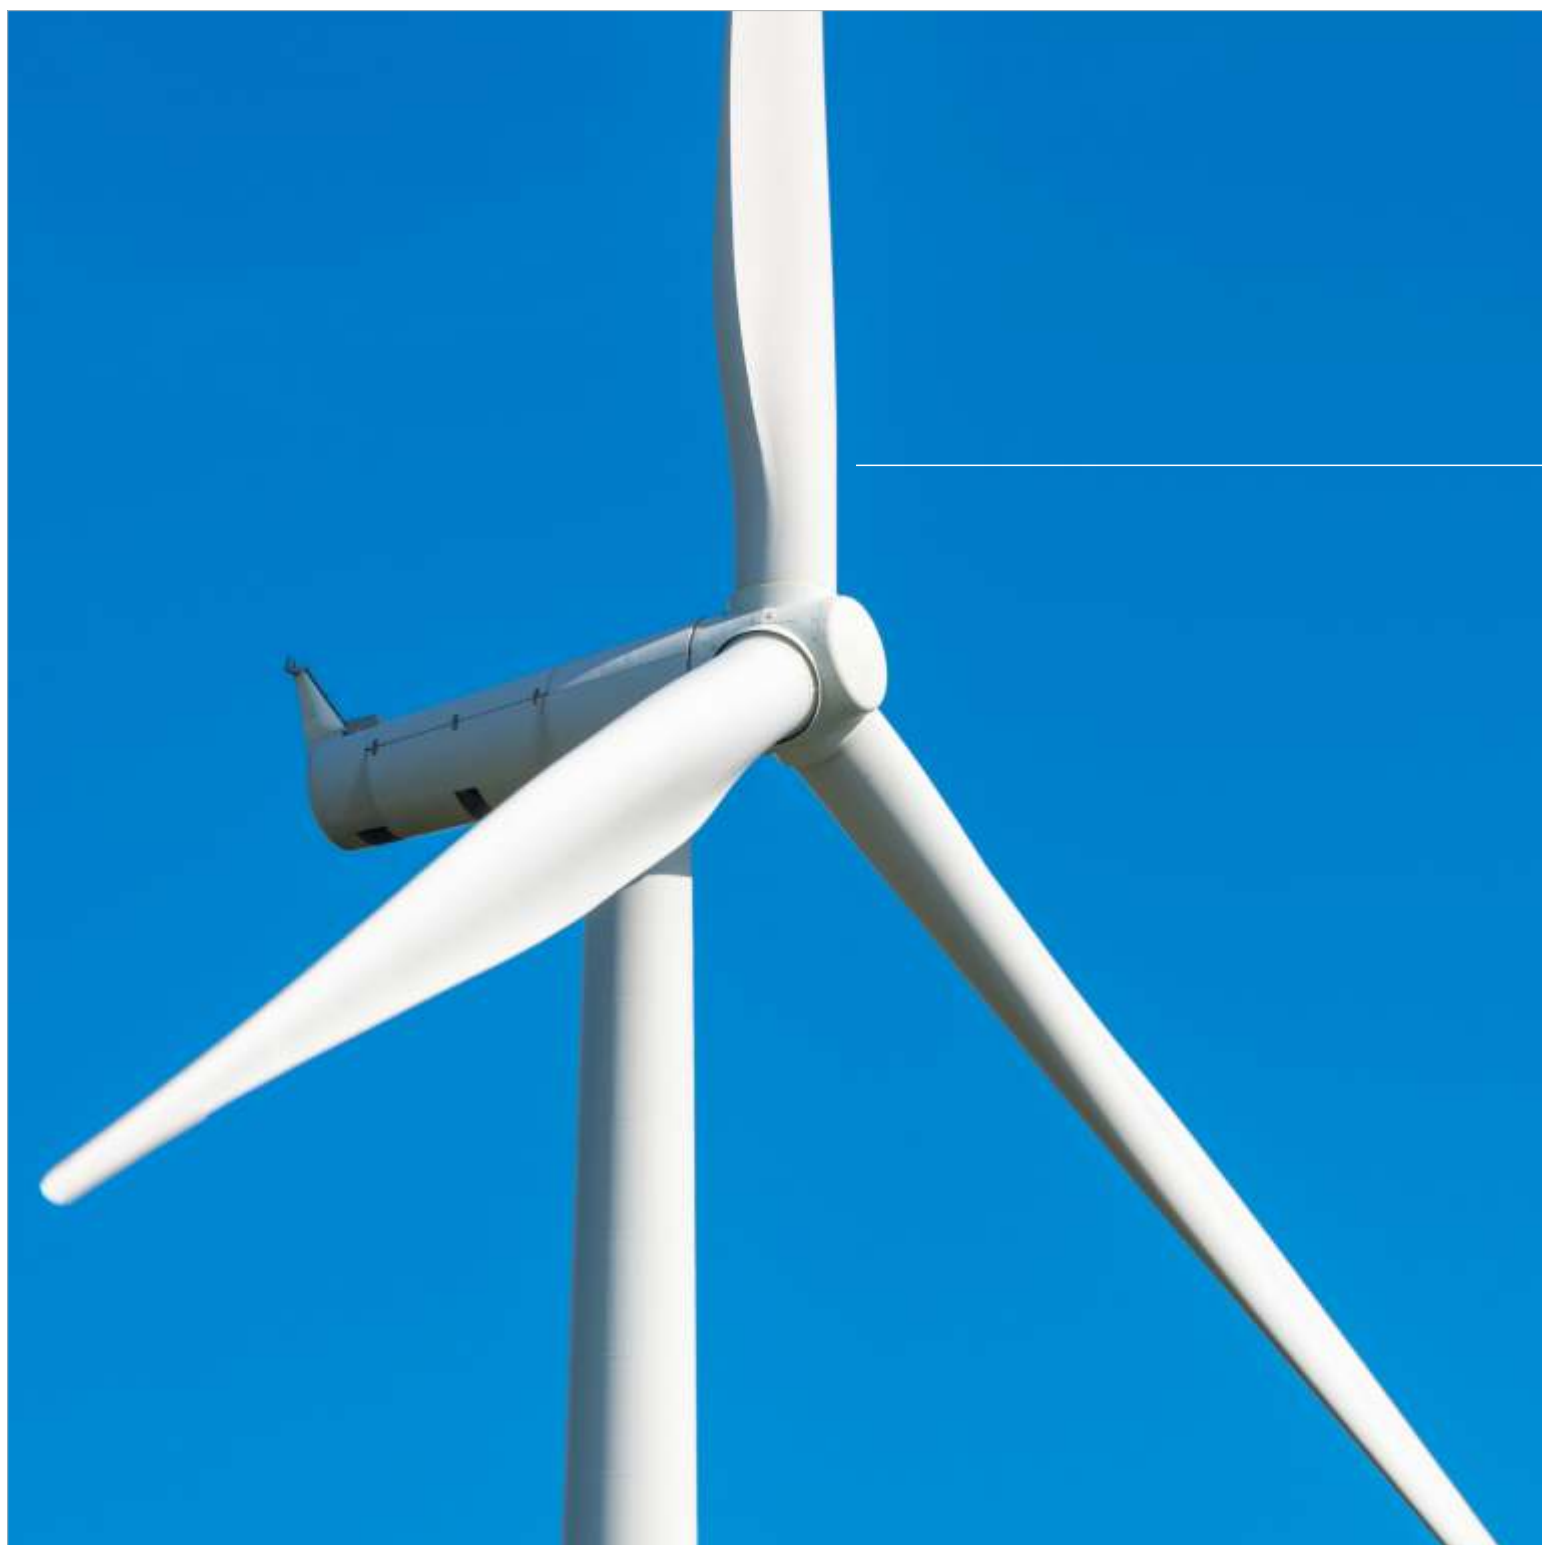

SAVE **PAPER**

Protecting Environment

We encourage electronic medium for communication and recycle our used paper.

“We Care”

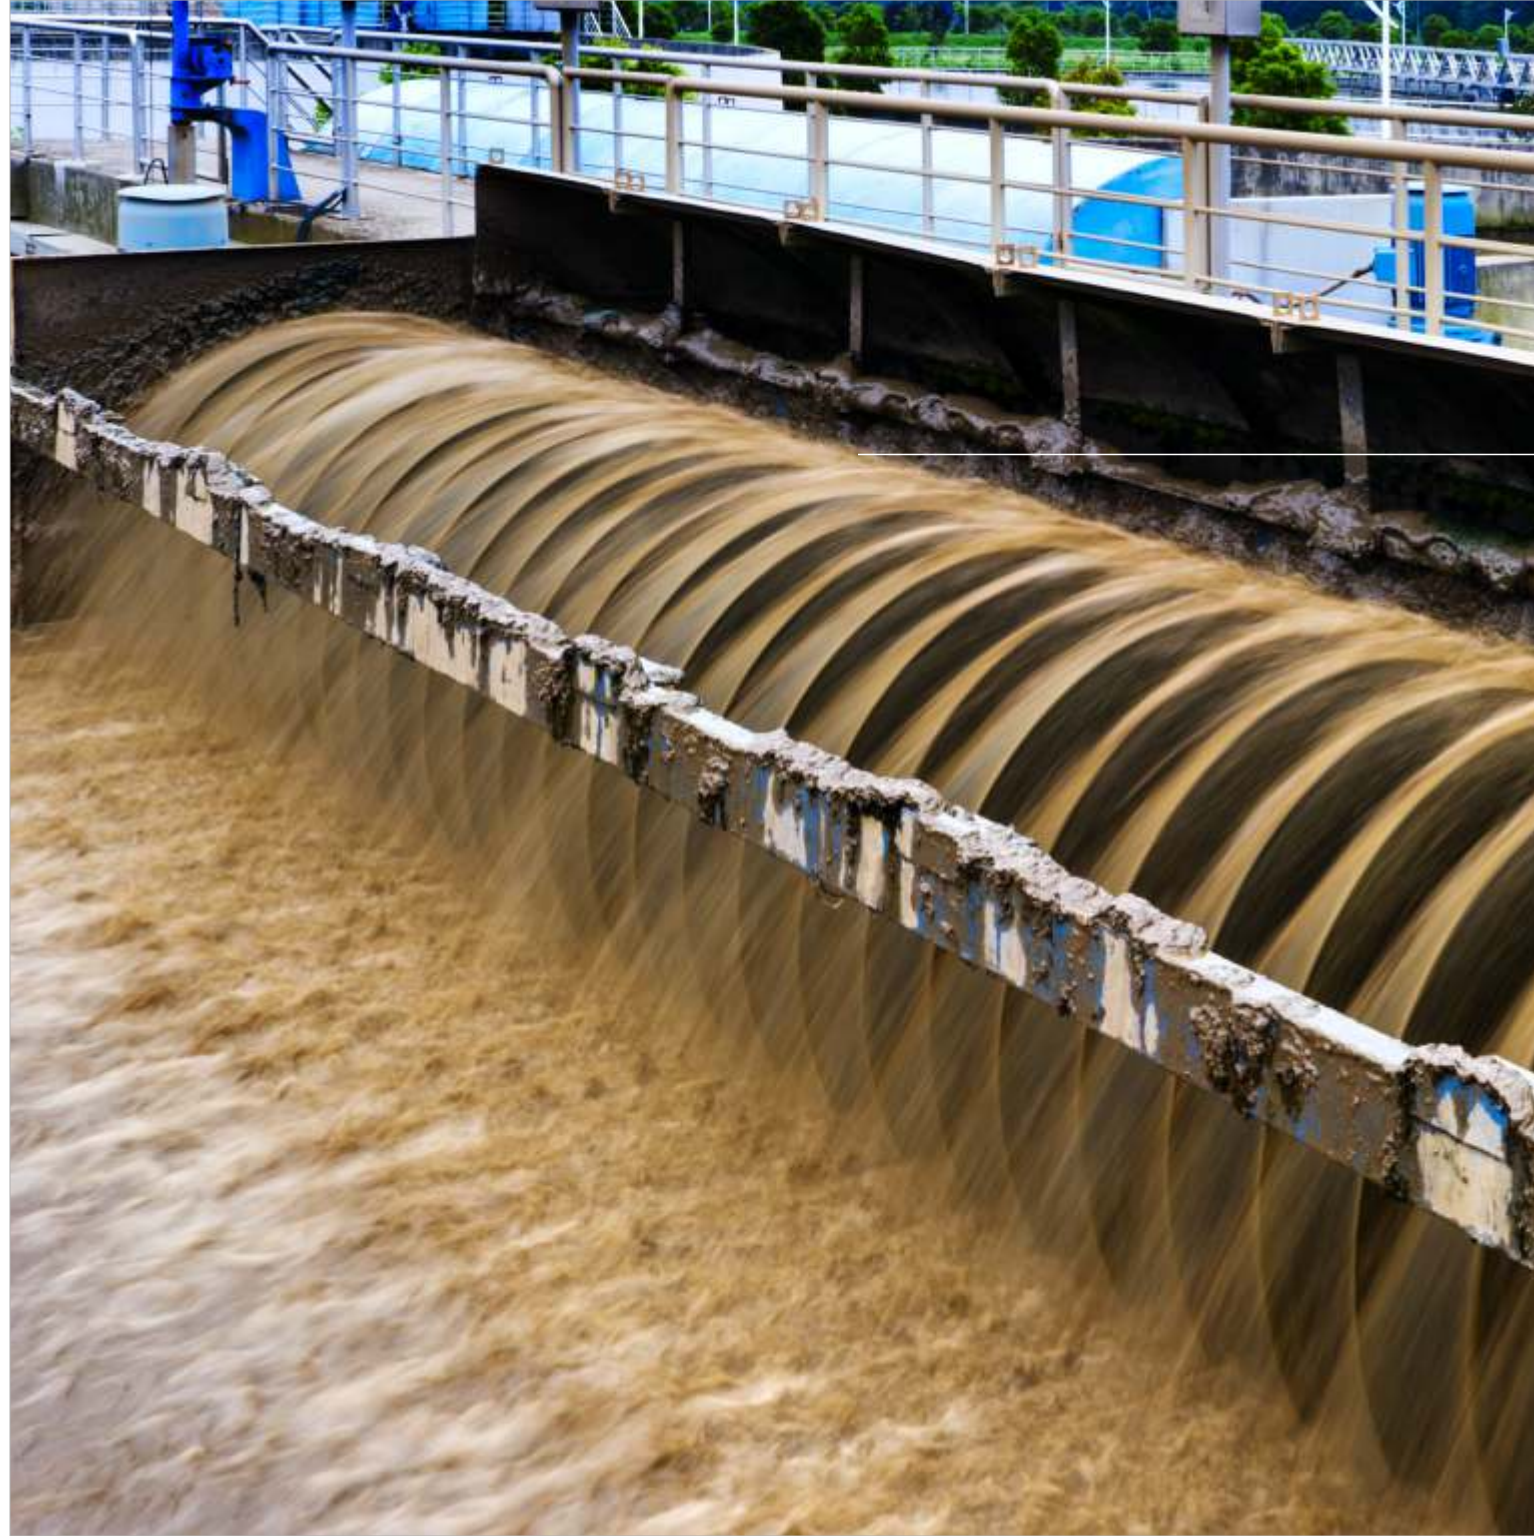

LESS ENERGY CONSUMPTION

Conserve Energy

All our hotels are equipped with LED lights and some with sensor light options to save electricity. Our initiative of sourcing electricity generated from windmill (renewable energy) as well as use of smart air conditioning units which consume less energy is highly successful. We have installed solar panels at our hotels for heating water and some hotels use the solar panels for lighting.

“We Care”

REMOVE **POLLUTANTS**

Remove Pollutants

Our infrastructure is equipped with sewage treatment plants enabling waste management to protect the environment. We also have effluent treatment plants to manage the waste from kitchen and laundry. The treated water is used for cooling towers, horticulture and in some hotels for WC flushing system. Our hotels also manage the kitchen wet waste with Organic Waste Converter.

“We Care”

NO FOOD IS WASTED

Optimum Utilisation

We engage with the weaker sections and for more than three decades have been distributing fresh food to the needy through organizations like Mother Teresa's Missionary home, Akshay Patra. Our recent collaboration with Robin Hood Army has helped us widen our reach to more underprivileged sections of our society.

“We Care”

WHAT **WE SERVE WE GROW**

The Healthy Way

Keeping the health of our guests in mind we endeavour to use organically grown vegetables and herbs under our “We serve what we grow” initiative.

“We Care”

CHEMICAL FREE

Glowing You

The personal care products of Kronokare are free of Sulphur, Silicone, Mineral Oil and Paraben that can cause skin damage because “We Care”.

“We Care”

BUILDING A **GREEN INDIA**

Save Environment

The Lalit team has planted 1.5 lakh trees in Bengaluru, approx 10 thousand trees in and around Khajuraho, approx 50 thousand trees in Delhi/NCR besides planting thousands of trees across its other locations as “We Care”.

“We Care”

RADIATION FRIENDLY

Radiation Friendly Environment

Electronic appliances rule the present age and emitting radiations is a major part of their mechanism. All these radiations tend to increase the stress level and cause slow but severe health issues. In an effort to reduce the harmful effects of various radiations, all our hotels are equipped with the latest Radiation Management Solutions. This makes us the first hotel chain in the country to provide a controlled radiation environment for our guests and employees because “We care”.

“We Care”

DEVELOPING **DESTINATIONS**

Developing Destinations

“We do not develop hotels we develop destinations”. Our initiatives involve the local population, their handicrafts, culture, food, thereby giving them training and employment to boost the economic environment. Our approach of “We Care” has made The Lalit a successful catalyst for cultural rejuvenation and energy in many of the less explored regions in India.

“We Care”

LOVE **FOR ALL**

Pure Love

Our most valuable asset – our people, remain our top priority. As an “equal opportunity organization” we have on rolls speech and hearing impaired, transgenders, country's first differently abled DJ, and more recently our first blind employee. This is further amplified externally with special events curated for LGBTQIA, our Tie up with Inclov for differently abled get togethers and association with Make love Not Scars – an NGO working for acid attack survivors, to name a few.
